

Some User Stories

As a night club owner I can book DJs for my venue.

As a Festival organisier I can book DJs for the event.

As a deep house music fan i can find upcoming events,
Listen to dj mixes and listen to and buy latest track releases.

As a Deep House DJ I can find and listen to latest track releases and buy.

Colour theme

I want the website to have the feel and mood of a nightclub, so im thinking dark colours and use verious shades of grey.

Text in white, Icons red, blue or green.

Style

I aiming for a modern and simple website that looks professional and sophisticated.

Desktop

Main landing page

The main page will have a full screen image of people dancing in a nightclub. It will have the main logo and a short discription of our services.

The site will scroll vertically

I am still not 100% sure on the layout.
I am thinking would it be better to have the About, and Media sections on a differint page, as am worried that there might be to much on the one page layout.

Mixes and New Releases

Top 5 will have some embedded tracks from a music website.

The mixes section will include some mp3 files from a radio show podcast that you can listen to.

Upcoming Events

Im thinking of using a table for listing the upcoming events.

Tablet

About Us & Media Images

For the tablet and phone versions I will remove some text and images.
